

## Pwn : Easy as Pie!

Description : My friend just spent hours making this custom shell! He's still working on it so it doesn't have much. But we can do some stuff!

He even built a custom access control list for controlling if you can access files.

Check it out!

nc challenges.auctf.com 30010

Solutions :

1. Connect to nc server.
2. Check the available commands.
3. Input help command.
4. Available commands are cat, help, ls, write.
5. Input ls command.
6. There are 3 files. (acl.txt, user.txt, flag.txt)
7. acl.txt content is wrote about user permission.
8. Rewrite the content of the acl.txt to see the contents of .acl.txt.
9. Write flag.txt:user:666 acl.txt
10. Write .acl.txt:user:600 acl.txt
11. Cat .acl.txt
12. Flag is auctf{h4\_y0u\_g0t\_tr0ll3d\_welC0m#\_t0\_pWN\_l@nd}

**Flag :** auctf{h4\_y0u\_g0t\_tr0ll3d\_welC0m#\_t0\_pWN\_l@nd}
